Chukwuemeka Eze

Software Developer

Lagos, Nigeria | 0810 013 1711 | chuksmobile98@gmail.com | devchuks.vercel.app | github.com/devchuks98

Summary

Software developer based in Lagos. I build mobile and web products, and I have shipped apps to the Google Play Store. I currently work at Chef Fregz in an admin and software role, handling day to day operations and building the internal tools the kitchen runs on.

Experience

Admin and software, Chef Fregz — Current

- Handle administrative and operational work for the business.
- Build internal tools where a process needs it, including the kitchen dashboard and the POS app used at events.

Lead mobile developer, early stage startup — Feb 2024 to Feb 2025

- Led development of a Flutter app with a Firebase backend, as the sole lead developer in a small founder led team with no dedicated product or QA function.
- Owned architecture and priorities with the founder, and coordinated the other developers on scope, task breakdown and delivery timing.
- Debugged and stabilised the app across releases, using AI assisted workflows to cover more ground with limited engineering headcount.

Mobile developer intern, Premium ESOWP Limited — Jun 2023 to Jan 2024

- Built and debugged mobile application features from specs set by senior developers, iterating on their review.
- Tested app performance across multiple devices and OS versions to catch issues before release.

Selected Work

Kitcho Live on Google Play
A food delivery app for the Nigerian market. Customers discover local chefs and home kitchens through a short video feed, and order from it. Flutter, Dart.

Experts Live on Google Play
An app for sharing and finding short, practical tips by topic. Flutter, Dart, Cloud Firestore.

Unispot Shipped
A campus app where students connect, buy and sell, and find paid gigs. Flutter, Dart, Firebase.

Kitchen Dashboard and Event Records Internal tool at Chef Fregz
Records and organises the jobs and events the kitchen handles, so the work is tracked in one place instead of across notes and messages.

Jaiye POS Internal tool at Chef Fregz
A mobile point of sale app for Jaiye operations, used to manage orders and sales during pop ups and events.

Menda Live
A hospital states a bill, a community covers it, and the money goes straight to the hospital, never to a patient. menda.com.ng
Flutter, Dart, Supabase.

Education

B.Tech, Mathematics
Federal University of Technology, Owerri
2018 to 2023

Technologies

Mobile	Flutter, Dart
State management	Riverpod, Provider
Web	Next.js, TypeScript, React
Backend and data	Firebase, Cloud Firestore, Supabase, Postgres, REST APIs
Tooling	Git
Spoken	English, Igbo
